Saga utilizes certain financial measures that are not calculated in accordance with generally accepted accounting principles (GAAP) to assess its financial performance. The attached Selected Supplemental Financial Data tables disclose "actual", "same station", and "pro forma" financial information as well as the Company's reconciliation of non-GAAP measures: GAAP operating income to station operating income, GAAP net income to trailing twelve-month consolidated EBITDA and actual operating results to same station operating results as well as other financial data. The actual financial information reflects our historical financial results and include the results of operations for stations that we did not own for the entire comparable period. The same station financial information reflects only the results of operations for stations that we owned for the entire comparable period. The pro forma financial information assume all acquisitions in 2024 occurred as of January 1, 2024. Such non-GAAP measures include same station financial information, pro forma financial information, station operating income, trailing 12-month consolidated EBITDA, and leverage ratio. These non-GAAP measures are generally recognized by the broadcasting industry as measures of performance and are used by Saga to assess its financial performance including, but not limited to, evaluating individual station and market-level performance, evaluating overall operations, as a primary measure for incentive-based compensation of executives and other members of management and as a measure of financial position. Saga's management believes these non-GAAP measures are used by analysts who report on the industry and by investors to provide meaningful comparisons between broadcasting groups, as well as an indicator of their market value. These measures are not measures of liquidity or of performance in accordance with GAAP and should be viewed as a supplement to and not as a substitute for the results of operations presented on a GAAP basis including net operating revenue, operating income, and net income. Reconciliations for all the non-GAAP financial measures to the most directly comparable GAAP measure are attached in the Selected Supplemental Financial Data tables.
