The "as reported" amounts reflect our historical financial results and include the results of operations for stations that we did not own for the entire comparable period. Saga Communications utilizes certain financial measures that are not calculated in accordance with generally accepted accounting principles (GAAP) to assess its financial performance. Such non-GAAP measures include same station financial information and free cash flow. These non-GAAP measures are generally recognized by the broadcasting industry as measures of performance and are used by Saga to assess its financial performance including but not limited to evaluating individual station and market-level

performance, evaluating overall operations and as a primary measure for incentive based compensation of executives and other members of management. Saga's management believes these non-GAAP measures are used by analysts who report on the industry and by investors to provide meaningful comparisons between broadcasting groups, as well as an indicator of their market value. These measures are not measures of liquidity or of performance in accordance with GAAP, and should be viewed as a supplement to and not as a substitute for the results of operations presented on a GAAP basis including net operating revenue, operating income, and net income. Reconciliations for all of the non-GAAP financial measures to the most directly comparable GAAP measure are attached in the Selected Financial Data Non-GAAP Disclosures tables.
